Triple Pinch Pleat

Tracking & Brackets

Tracking

- Square tracking
- Curved front tracking

Brackets

- Top fix brackets
- Single face brackets
- Double face brackets

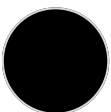

A single-track curtain setup consists of one track, allowing you to hang a single layer of fabric. This design is ideal for basic light control and privacy. On the other hand, a dual-track curtain system features two tracks. Typically, this setup pairs a blackout curtain on the outer track (face fit) with a sheer curtain on the inner track (rear fit). This configuration allows you to enjoy the gentle warmth of natural light during the day with the sheer layer, and switch to the blackout layer at night for complete privacy and light control.

Colours

Pure White

Black

Tracking and brackets are available in black or white.

Fabrics

Blockout Fabric

Completely blocks out light, providing maximum privacy and darkness—ideal for bedrooms and media rooms.

Sheer Fabric

Softens natural light while maintaining privacy, perfect for creating a warm, diffused glow in living spaces.
