RB09 Chain Drive

Operation

Manual

Easily control your roller blinds with two options: the affordable manual chain drive, which lets you adjust the blinds by pulling a chain, or the smooth spring air system, allowing quick, precise adjustments by lifting or lowering the bottom rail by hand.

Easy Spring Air

Remote Control

Smart Device Control

Motorisation

Power your Roller Blind using a wired-in or battery-powered motor. Enjoy effortless and convenient operation with the simple touch of a button.

Home Automation

Take motorisation to the next level all from the convenience of your smart device! Seamlessly connect your device, hub, and Roller Blind to effortlessly schedule your blind's daily operation. For even more convenience, enjoy hands-free voice control by integrating with your Smart Home platform.

Brackets & Bottom Rails

Brackets

- Single brackets
- Dual brackets

A single bracket roller blind has one roller with a single fabric for simple light control and privacy. A dual bracket blind combines two rollers, typically pairing a light-filtering or screen fabric for daytime use with a blackout fabric for nighttime privacy.

Bottom Rails

- D30 Standard
- Oval
- D30 Silent
- Tear Drop Fabric Wrap

Choose the D30 or Oval for a sleek, modern look, or the D30 Silent with a bubble strip to minimise noise from movement in the breeze. For a seamless finish, the Tear Drop Fabric-Wrap extends the fabric over the rail, creating a cohesive look.

Sandstone

Blockout Fabric

Completely blocks out light, providing maximum privacy and darkness—ideal for bedrooms and media rooms.

Light Filter Fabric

Softens natural light while maintaining privacy, perfect for creating a warm, diffused glow in living spaces.

Screen Fabric

Allows natural light and visibility while reducing glare and UV exposure, making it ideal for areas with a view and rooms where privacy isn't a concern.
