

Highprofile Elements

Hybrid Painted Shutters

Highprofile Elements elevates the traditional plantation shutter with a modern twist. This innovative hybrid design combines a solid Poplar timber frame with durable PVC blades, resulting in a lightweight shutter that resists sagging and allows for wider panel expanses compared to full PVC shutters. By blending natural and synthetic materials, Highprofile Elements offers a stylish and cost-effective shutter solution built to last.

Components

Material, Frames & Stiles

- Poplar frame, rail and stiles, PVC blades
- Select from L, Z, or decorative frames, and flat or beaded stiles to complement both modern and traditional homes.

Blades & Control Rods

Blades

- Elliptical blade 64mm, 89mm, 114mm

Control Rods

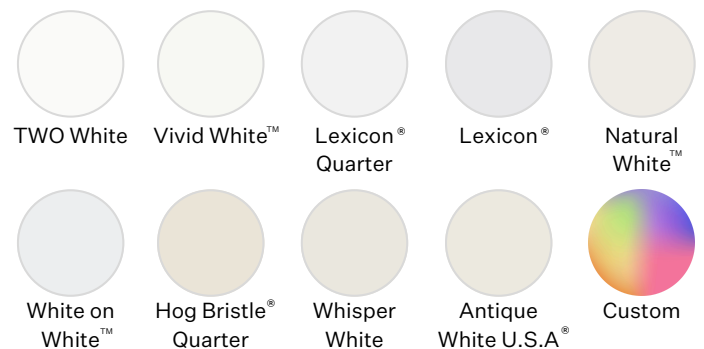

- Clearview
- Traditional Centre
- Offset 40
- Euro 180

Installation Options

- Hinged
- Fixed
- Multi-fold
- Sliding
- Corner
- Bay
- Panel only

Finish & Colours

Highprofile Poly shutters are finished with a premium 2-pack polyurethane paint, the same high-quality coating used in high-end cabinetry. This ensures a durable and flawless finish that enhances the look and longevity of your shutters. The colour range is inspired by Dulux's popular interior whites.
